## Getting Started with Google Colab

*Python Programming for Linguists*

Ingo Kleiber, 2021

**Note:** This video can be watched independently of all other videos in this workshop!

# Google Colaboratory / “Colab”

- *Google Colab* = **executable documents** containing both code and documentation
- Interactive coding environment that allows us to **write, run, and share code in the browser**
- Cells can contain code (e.g., Python) and other content
- Technically, these are basically *Jupyter Notebooks* in *Google Drive*
